STONY PLAIN.

ALBERTA THURSDAY.

NOV. 28, 1929.

Whole Number 486

Two More White Crosses.

The fatality last week at the Beuerlein railway crossing again calls the attention of the authorities to this dangerous trap which the traveling public have to encounter.

When the grading of the Baseline was begun last season there seemed to be an impression that a subway would be constructed at this level crossing, to take care of the increasing traffic. In its stead, however, a new level crossing was constructed a short distance away, but the new crossing has never been thrown open to the public.

In Ohio, we believe, they have a quaint custom of erecting a white cross at a railway crossing for every death there. White crosses erected at this level crossing would, no doubt, serve as a warning to the careless driver; and, conversely, would be a striking reminder to the Highway and Railway authorities that there is something radically wrong at this point.

Stony Plain and District.

And this is Canada's National Fish Week.

Mr and Mrs Jack Barrie are leaving next week, to spend the winter in Los Angeles.

The Local W. I. held their whist drive Thursday night in Miller's Hall, with a good crowd in attendance. Winners—Ladies, Miss Ashcroft 1, Mrs Malloch 2. Gents, Aug Sherman.

Stony Plain lodge, L.O.O.M., have issued invitations to a whist drive, to be held this evening, in Miller's hall.

Subscribers not receiving their local paper regular, will kindly call at The Sun office and get a copy.

Local Skaters Meet

A meeting of members of the Skating and Curling Club was held last week, in Miller's hall, with Mr E.H. Pidgeon, the president, in the chair.

The question of lighting the enlarged rink was up for discussion. A compromise was made by awarding the supplying of the material to Stony Plain Hardware, and the work to be done by Electrician H. Trapp.

The proposal to re-appoint Carl Miller as caretaker of the rink seemed about to go thru, at an increased salary of \$45 per month, when a member present underbid him for the position; with the result that tenders will be called for the job.

Considerable time was given to the arranging of a satisfactory schedule for skaters and hockeyists. A table was arranged which gives Mon., Wed., Fri. nights and Sun. afternoons to skaters; and Tues., Thurs. and Sat. evenings to hockey players.

The rink will be, free Sat. afternoons for all skaters who are Public school pupils. This schedule to be submitted to Town Council for its approval.

Well Known in Stony.

The Dr S W D Frith, who captured the Sweepstakes for his wheat exhibited at the Royal Show in Toronto last week, will be remembered by Stony Plainers, when the Dr was farming a few miles north of town, about seven years ago. At that time, he secured a number of high awards for his purebred sheep, at the big exhibitions, and also for his poultry. The Dr. is now farming on 110 acres near Whitecourt.

A Popular Dance.

The Popular dance at the opening of the new Muir Lake Community hall last Wednesday evening, was a huge success, the floor being well filled each time the orchestra struck up. The members of the Community who built the hall have much to be proud of in their new dance layout. Stony Plain was well represented at the opening.

Solving Canada's Economic Problems

A country possessed of the vast extent and great variety of natural resources which stretch out from the Canadian sea to sea, and north and south from the international boundary line to the Pole, has a responsibility not only to its own people but to the world at large. The heritage with which nature has endowed the Canadian people is one of the richest, if indeed not the richest, on this globe. It consists of some of the greatest fisheries in the world, the greatest forests, the greatest water-powers, tens of millions of acres of the most fertile agricultural lands, while hidden below the surface and in the rocks lies what is now being recognized as probably the world's greatest store of mineral wealth—coal, iron, nickel, gold, silver, copper, zinc, tin, asbestos, and scores of other minerals required for the use of mankind.

Save, and except some of the more precious stores, and those things which are alone the product of tropical countries, Canada enjoys possession of practically everything needed to build up and maintain the great industries of this and future ages. Possession of such a storehouse of wealth imposes a great responsibility on this Dominion, but it also presents a great opportunity.

How are the Canadian people developing these enormous reservoirs of potential wealth? What are they doing with them? While the country was still young, sparsely settled, and the people comparatively poor, the trees of the forests were cut down and shipped abroad as logs, rough sawn lumber and pulpwood. But now Canada is the largest paper manufacturing country in the world, and the products of much fine furniture and other goods.

For years Canada's great tonnage of nickel, copper and zinc ores was shipped to other lands to be refined and manufactured for use in industry; now huge refineries are being established in which these ores will be processed at home. While, owing to its enormous grain production, Canada is and will long continue to be a big exporter of wheat, this country has forged rapidly ahead in the industry of milling, sending the finest flour in ever increasing quantities into the markets of the world.

A similar story can be told of the development and use being made of other of our natural resources. There is this, however, to consider. Some of Canada's mineral wealth is of low grade, and much of its value results from the fact of its enormous quantity, as, for example, the lignite coal of the west. So, too, the large iron deposits of Ontario are difficult and expensive to work for commercial use. But are we, for these reasons, to neglect them and abandon the wealth they might bring to Canada, and lose the benefits which rightly developed they would confer upon the Dominion?

These very difficulties are a challenge to the people of Canada. They are a test as to our fitness to be entrusted with the heritage which is ours.

Up to the present time Canada has devoted too little attention to, and been too niggardly in its public expenditures, upon scientific research. Rather, as a people, we have been inclined to take the easier way and seek to protect our interests by artificial means, or been content to accept minor profits from the sale of raw products, rather than through scientific research and experimental expenditure find solutions to our problems and greater wealth for our country. Perhaps this was natural, even inevitable, in a young country. But that day is passed if Canada is to be true to itself.

The Dominion Government, the Ontario Government, several huge corporations, universities, and private individuals of wealth, are, in the aggregate, providing millions for research work; the most modern buildings and laboratories and the finest equipment are being provided. Already important results have been achieved. It is confidently believed that a type of rust resistant wheat has been developed, while the National Research Council has demonstrated where science is greater than tariffs and trade commissioners when it comes to developing trade. An Ottawa despatch tells how it has re-established Canadian magnesite on the markets of the world.

Magnesite is used in furnaces or other places where great heat is required. It came originally from Austria, but the war gave Canada a chance and deposits in Quebec were developed. After the war Austria came back, deposits were found in California, and the United States tariff shut Canada out of that market. Canada lost the business. The owners of the Quebec mines appealed to Ottawa, and the Government, declining to impose tariff protection, turned the problem over to the National Research Council. The scientists of the Council developed new production methods and today Canadian magnesite has not only got its markets back but is beating the California product in the United States, where it commands a higher price now because of its better quality.

A similar story can be told about a Saskatchewan clay-working plant. It was steadily losing money. Then the Saskatchewan Government stepped in and Professor Worcester, of the University of Saskatchewan, was assigned to the problem. He discovered a proper mixture of clays, with the result that the plant in question is now making money, has enlarged its build up and added to its equipment, and is today supplying a large proportion of certain types of fire brick and locomotive arch bricks used in Western Canada, but which formerly had to be imported from the United States.

Scientific research has great things in store for a country like Canada. It costs time and money to prosecute it intensively, but it will repay a hundredfold. The Canadian people should not regard it as a hobby, or a fad, but a sound business proposition and be prepared to support their Government and scientific bodies in largely extending the scope of such research.

Normal Period of Married Life

Insurance Statisticians Have Worked Out Scale

Insurance statisticians, after months of research, have worked out to one decimal point the period of nearly

married couples may expect to live together—leaving out the possibility of divorce, fast becoming a major factor.

It was announced recently that a man of 33 and a woman of 30 may expect to live together 27.3 years before death, in the normal course, separates them.

A woman's expectation of life at 30 is 33.3 years; that of a man at 35 is 33.4 years. This type couple in 35.6 per cent. of cases, it is asserted, will live beyond the 27.3 average before one of them dies; in 7 per cent. of cases, both will be dead before that time; in 15.6 the wife will have died, and in 23.6 the husband will have died.

Editor—"There's only one thing keeps this from being a rattling good yarn."

Eager Author—"What's that?"
Editor—"It isn't."

Western Canada Fisheries

Opening of H.B. Road Will Extend Fishing Grounds in the North

With the opening of the Hudson Bay Railway next year, new areas will be opened up in Northern Manitoba and Saskatchewan not only rich in minerals but in fish. There are numerous lakes and waterways adjacent to the new railway which will enable commercial fishing operations to be extended. Millions of pounds of fish are caught in the large inland lakes in Western Canada, much of which is shipped to Chicago and New York, as well as to markets in Canada. The principal fish in these lakes are whitefish, sturgeon, trout, pickerel and tulad.

RADIANT GIRLHOOD

Comes Through Rich, Red Health-Giving Blood

A girl with a full-blooded body and vital nerves has the foundation of an active, healthy life. Allow her to grow young and delicate and prolonged ill-health and general weakness may be the result. Much of this is due to the fact that in the very prime of life she too frequently suffers of headaches, nervousness, and is easily tired and breathless, because of anemia which stealthily attacked them in girlhood.

But fortunately there is a remedy within easy reach. Thousands of tired, worried women and delicate girls who have sought the self-help of Dr. Williams' Pink Pills are grateful for the way in which these pills have restored them to robust fitness. This effective tonic and nerve restorer always helps to make plenty of rich red blood that speedily puts an end to anemia. A worn, delicate girl, or tired mother, soon becomes brighter when this new blood courses through the system. Color comes to her cheeks and lips; her appetite increases; her nerves are steadied, and the following day she is able to do her work. She becomes vital and active again, among thousands of what these pills have done, and can. Miss C. J. Martin, Kitchener, Ont., says: "For several years I was greatly distressed with pains in the back and sick headache. I felt tired all the time, did not sleep well and had a poor appetite. I had been doctoring, but did not get much relief. My sister advised me to try Dr. Williams' Pink Pills and after taking six boxes I felt like a new person, and will not be without the pills again."

You can get the pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Navigation At Churchill

Port Open To Ocean Vessels Till Late In November

Ocean vessels would have no difficulty in using the port of Churchill until the latter part of November, according to J. U. Beauchemin, head of the party doing hydrographic survey work at Port Churchill harbor and on Hudson Bay. There would doubtless be a little shore ice off the harbor in November, but he says that there would be no danger of a vessel becoming ice bound until late in the month.

Mr. Beauchemin and his party have just returned to Sydney from the Hudson Bay. It is not clear from his interview that he was including in his statement any reference to Hudson Strait. But he does contradict the report brought down from Hudson Strait by the almanac on the "Utah" Bowler, which was wrecked up there, that the government steamer Acadia, which carried the hydrographic survey, was stuck in the ice for seven days. The vessel remained in the ice only for 30 hours, he says, and it did so purposely for the study of ice conditions, while it could have moved out of the ice field at any time.

It is easy to exaggerate the difficulties of the northern route. There are some difficulties and the best modern methods of meeting them will be used. If, as is quite possible, the Hudson Strait is navigable well into November, then this route will be in quite as good a position to handle the western grain crop in the fall of the year as is the route by the Great Lakes. The port of Montreal usually closes before the end of November and it takes the grain much longer to get to Montreal than to Churchill.

Traffic on the Hudson Bay route will begin in a modest way and with the overcoming of the various difficulties a great expansion of traffic and a great future for the route may be expected.—Free Press.

Use Milburn's Lintment in the Stables.

Chillblains & Frost-Bite

A remedy for those most troublesome of winter skin ailments, chilblains and "frost-bites." Zam-Buk is specially effective. It takes out inflammation and reduces swelling in a wonderful way and stops the fiery tingling and irritation.

Where the chilblains are broken and have a raw ulcerated surface, Zam-Buk is doubly valuable because of its great healing power. Its pain-killing efficiency and its fine antiseptic properties place Zam-Buk far above ordinary ointments.

SOOTHES & HEALS

Flying Interests Royal

Prince and His Brothers Are Keen About Aviation

The fact that the Prince of Wales has appointed a regular air pilot among his routine draws renewed attention to the remarkable keenness shown by the Prince for flying. It is some years since he went for his first flight, but ever since that memorable occasion he has exhibited extreme air-mindedness.

Such attention has been given to the air pilots of the Prince of Wales, however, that most people are unaware that one of his brothers has long been a fully-fledged pilot. The Duke of York is a group captain in the Royal Air Force, and, as such, understands the entire control of an aeroplane. He is also air side-decamp to his father, the King, says a writer in "The Daily Express," London, England.

The Duke of Gloucester made his first flight recently, while Prince George has flown on several occasions, although not in a small machine. He has made two cross-Channel trips in an Imperial Airways liner, travelling incognito and accompanied by an equestrian.

With all his sons "in the air," the King may yet consider taking a trip himself, but one feels sure, there will always have to be a satisfactory settlement of two matters before this can take place. First, without a doubt he will be accompanied by the Queen, and second, he will fly only if his subjects are absolutely certain of the safety of the flight.

The vessel is a pure killer, destroying more animals than it can consume.

All over Canada farmers are coming to realize the great value of the birds to agriculture.

Prospecting In the West

Large Number Of Claims Staked and Recorded During Past Year

Some idea of the amount of prospecting being done in Manitoba and northern Saskatchewan may be obtained from the number of claims staked and recorded during the past year. In 1928 there were 7,335 mineral claims recorded in the Pas mining district, 1,400 in the Cold Lake district, and 2,118 in the Winnipeg district. There are at present over 20,000 mineral claims recorded in Manitoba and northern Saskatchewan.

Pains Around Heart Weak Spells Would Fall Over

Mrs. James Vanastine, Fibrock, Minn., writes:—"I had pains around my heart, and suffered with weak, smothering spells. Sometimes I would fall over and would have to be picked up and put to bed."

"I used several boxes of

**MILBURN'S
HEART
AND
NERVE PILLS**

and it is now over three years since I have had a spell.

"I hope anyone who is in the same condition I was will give H. & N. Pills a fair trial."

Price, 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

"Haven't we met before?"

"Well, you seem familiar."

The pole star is always directly over the North Pole.

Needless Pain!

Don't be a martyr to unnecessary pain. Lots of suffering is, indeed, quite needless. Headaches, for example. They come without warning, but one can always be prepared. Aspirin tablets bring prompt relief. Keep a bottle of them in the office. Carry the small tin in your pocket. Then you won't have to hunt a druggist, or wait till you get home.

And do not think that Aspirin is only good for headaches, sore throats, and colds. Read the proven directions for relieving neuralgia, neuritis, rheumatism, and other aches and pains. Remembering, of course, that the quick comfort from these tablets is not a cure for any continued pain, see a doctor.

Purchase genuine Aspirin. Protect yourself by looking for that name. Always the same. Always safe. Never hurts the heart.

ASPIRIN
TRADE MARK REGD.

Unusual Historic Interest Is Attached To The Main Water Routes Of Northern Canada

Practically speaking all the main water routes of Canada have been travelled for a century or more. The vell that for so long obscured the movements of the early travellers and traders is being slowly lifted by modern surveyors and with the progress of organized mapping methods almost limitless lands of scenic beauty, rich in resources, are revealing themselves with the stage all set for an era which will be theirs, the area of northern development.

In the new Pelican Narrows map, Provisional Edition, National Topographic Series, embracing 5,000 square miles on a scale of four miles to the inch, presently released from the presses of the Topographical Survey, Department of the Interior, at Ottawa, another segment of their surprising inheritance is brought to the notice of Canadians.

The map is featured by the Churchill River, with the famous trade route, 261 miles long, from The Pas by Sturgeonwater River to the Churchill, and Frog Portage, cutting the southern portion in two. The Reindeer River, which is the canoe route leading to Reindeer Lake, divides the northern half.

As long ago as 1775, Joseph Froblisher, of Montreal, Northwest Company fur trader, discovered the Sturgeonwater River route from Cumberland past Pelican Narrows to Frog Portage on the Churchill, which has remained ever since the main waterway leading to the northern interior and the great Mackenzie Basin.

Froblisher was so successful in his first year's trading that he was unable to carry away all the furs he acquired. In 1776, Alexander Henry, the elder, and the Froblisher brothers built a post at this point, and that year obtained 12,000 heavier skins from the Indians "besides large numbers of other and marten."

Peter Pond, also from Montreal, followed Froblisher's route to Frog Portage in 1778, and eventually reached Lake Athabasca. His map of 1785, said to have been made for the Empress of Russia, is the first one that shows the Churchill from its source to its mouth.

After Pond came those distinguished forerunners of the surveyors of today, Philip Turner, surveyor for the Hudson's Bay Company, in charge of a survey party with Malcolme Ross as his assistant surveyed the Sturgeonwater River up to Pelican Narrows, and on to Frog Portage in 1791, and from thence made a track survey of the Churchill to its source. His report is in the head office of the company in London. His sketch map was incorporated in Arrowsmith's map of North America.

David Thompson, greatest surveyor of them all, travelled the country embraced in the Pelican Narrows sheet in 1796, and surveyed the portion of the Churchill thereon to the mouth of the Reindeer River, and the Reindeer itself to Reindeer Lake, which lies off the map to the north. Below the junction of the Reindeer and Churchill the Indians report the remains of an old trading post, supposed to be the Fairford House built by Thompson.

Another famous explorer-surveyor, Peter Fidler, between 1807 and 1809, reported Thompson's survey of the Reindeer and the portion of the Churchill in the newly-mapped area. For nearly seventy years after, until the late Dr. Robert Bell reported on it, the Upper Churchill was ignored by geographers. With the issue of the Lac la Ronge, Pelican Narrows and Kiasiasing map sheets

by the Topographical Survey, 144 years after Peter Pond's first crude map, this portion of the river is completely defined and accurately mapped for the first time.

Today, as in the old days, when travellers were almost wholly dependent upon it, the fishing never fails. Sturgeon, whitefish, lake trout, pickerel and pike plentifully populate the bewildering waterways of connecting lakes and rivers.

And still the furs pour down the amphibian way from the Arctic to the Saskatchewan with the Pelican Narrows "fur garden," as Malcolme McLeod called it, adding its quota by the way. Romance has not departed from the region, even though the light "northern canoes" of birch bark guided by electric-eyrod Iroquois have been replaced by the cedar or canvas canoe of the modern surveyor, prospector and fur trader.

During the migrations from the breeding grounds near Hudson Bay the innumerable lakes swarmed with geese and ducks. Pelicans and cormorants breed in the track, nesting in great numbers on small rocky islets.

Across from Frog Portage a solitary settler raises grain and vegetables. Here he has constructed a primitive grist mill, the second one on the Churchill, the other having been burnt over half a century ago at Stanley, located as shown on the Lac la Ronge map sheet.

About the time that Warren Hastings began peeling the East Indian Empire together, in the same year that saw the battle of Bunker Hill, and while Captain Cook was spanning the way for British colonies in the Southern Seas, the Pelican Narrows country was traversed by Froblisher. Such as it was then it remains today, except that the wandering Indians have been more or less segregated on their several Indian Reserves on Pelican, Wood and Minnond Lakes, and around the Pelican Narrows post of the Hudson's Bay Company, where is one of the largest settlements east of Annapolis. At this point, too, there is a Royal Canadian Mounted Police barracks.

A good deal of water has flowed down the Hudson Bay in the century and a half, and on its tide many millions of dollars' worth of furs. Wild, as it looks, studded with lakes and threaded with greater and lesser streams, yet this 5,500 square miles of territory has contributed its share to the commerce of the country. Mines, timber and fishing resources are yet untouched and so are the water powers, with the exception of those at Island Falls now being developed.

Demand For Silver Fox

Has Become Most Popular Fur The World Over

What is the most popular fur among the world's women folk? According to Canadian breeders it is the silver fox, for the demand has risen by phenomenal leaps and bounds. A statement has been issued by the Canadian Silver Fox Breeders' Association to the effect that last year no fewer than 58,000 foxes belonging to its 6,000 members were inspected in all parts of the Dominion. The industry is now declared to be so well established that it is not very much affected by booms or depressions and is solidly based upon a steady market for Canada's furs the world wide over. Fox farming is therefore becoming one of the most popular and profitable of the major industries in the Dominion. Live foxes raised on Prince Edward Island farms sold last year at prices ranging from \$60 to \$300 per pair, those from families with exceptionally high pelt records fetching of course, much more.

Only One He Knew

A teacher had been telling an infants' class about the ten commandments. In order to test their memories she asked: "Can any one give me a commandment containing only four words?"

A hand was raised immediately. "Well?" said the teacher. "Keep off the grass," said the youngster.

An elephant's trunk contains 40,000 muscles.

3002

(By Annabelle Worthington)

A black crepe satin that follows the Princess lines with molded bodice and full flaring hem.

It employs the two surfaces of the crepe for trimming contrast.

The full surface is used for the entire dress with the exception of applied bands and trimming pieces attached to bands at left side, which are made of the shiny surface.

Style No. 3002 designed in sizes 16, 18 years, 36, 38, 40 and 42 inches bust is easily made in about two hours. The cutaway is very small, and it's a dress that will meet everyday requirements gracefully for the woman of moderate build. It's a splendid choice. Don't hesitate!

In feather-weight woolen in self-checked pattern in plain shade, it is a Paris favorite. It shows clever manipulation of fabric with the bands cut on the bias, repeated in trimming pieces.

Printed velvet with the bands made of plain velvet in predominating tone of print is very effective.

Plain sheer velvet in black with metal cloth bands in beige shade is exquisite for afternoons.

Fulle silk crepe, flat rayon crepe in tweed pattern, crepe de chine, canton crepe, and Kashmir jersey attractive selections. Pattern price 25 cents.

Province Wide Campaign Is Conducted In Manitoba For Promotion Of Oral Hygiene

Mouth health is a matter of romance. Evidence of this fact is contained in a public health report, just issued, which departs from the customary stereotyped phraseology to reveal a thrilling story.

Report of the Manitoba Mouth Health Campaign, issued by the Canadian Dental Hygiene Council is, in brief, a synopsis of a province-wide drive for the promotion of oral hygiene. An effort, organized, primarily, by the council issuing the report, it developed into co-operative campaign under the supervision of the Manitoba Dental Association, and under the auspices of the provincial departments of health and education, with the assistance of the Red Cross, and the active aid of practically every public welfare body throughout the length and breadth of Manitoba which from Emerson to The Pas was zoned.

Local committees appointed, and the dentists of the province gave their skill, time and whole-hearted enthusiasm to the task. The examining teams were individual, each child getting a chart, a list of personal suggestions and professional advice gratis.

In a manner of speaking, this service was a paradoxical one. Its purpose was to eliminate in the rising generation, the dental ill-health prevalent in this one, to the treating and remedying of which, naturally, these same men devote their careers.

But the romance comes largely from one special aspect of the affair. In the sparsely settled sections of the north were many children far beyond the services of a regular dentist. To these, of course, knowledge of the principles of oral hygiene so that they might forestall unhealthy conditions was of extreme importance. But there was the further question of treating existing cases badly in need of it and not only too far from the ordinary professional aid but also, very often, without the financial means to secure it if it were available.

For these—most of them new Canadians from lands where dental hygiene received scant attention—a free travelling clinic was put into operation and over 1,200 children received treatment.

The dentist in charge, Dr. Frank Livingstone, describes his trip to these scattered communities in a series of vignettes which are, of themselves, not only a fine piece of writing but also a striking picture of the modern Canadian pioneer.

He tells of his arrival in a tiny Icelandic community where a boarding house parlor is to be his operating room.

"School children, literally vanloads of them from the surrounding country," he says, "A swift examination, then a question or two, a slow injection of anesthetic. This is the first experience of dentistry for any of

these children, and one must be careful not to startle them. A brief dismissed and the next one. A cavity is cut out and the filling placed. Time now to extract for the first one. A few words of encouragement and explanation. A few seconds' swift work. Then, "Hurt? No." "Fine. Good stuff in you, boy," and confidence has been established. A satisfied child is away to show the place where an old offender has been, and explain his sensations to admiring mates.

"A cold winter morning and the mixed train has deposited dentist and equipment at yet another town. Here we set up office in the kitchen of a newly-built Women's Institute and Nursing Service Cottage. The children are waiting from the country, brought in in little cutters with houses built on them, complete even to a small warming stove. This is a ship shipping district and the people are wise in the ways of winter travel.

"Evenings spent in the dispensary," he says of another stop, "where the thin walls lack the huge log-burning stove, and where one needs must wear over-shoes under to keep the body heat in. Talks of travel and books and cases."

The travelling clinic reaches an outpost hospital.

"Another service station for humanity. A place of hope, the centre of community life and a haven working in the tremendous mass of foreign born surrounding it. A place where children came in hundreds, walking miles through blinding snow, by team, by train, in groups, shepherded by district mothers and nurses. Came, and came, and came, seeking relief and hurrying away to find a little sister or brother.

"Cased! Six-year-olds with abscesses draining through the neck. Thanks be for ether and the resident physician. Chewing on nerves that had suffered so long they had grown out of the tooth and hardened themselves with a tissue coat to stand the shock of anaesthetics. Teeth twisted and turned and appearing in almost all places in the mouth and all stages of decay. Cases."

At another town, the dentist pulled in at midnight to find the school teacher waiting for him.

"An extra sized toboggan was produced and the kit piled on it. Many were the laughs we had later of that pull through the snow in the pitch dark. To this day, he recalls that one of us was going north and the other south inside the rope that would have done credit as a hawser for an ocean liner. This time, a log embankment to work in with a bedroom as a waiting room.

"And Saturday night. Two other cases on the dining room table," he notes of another small community, "and the general assistance of the mother, next door. Later when the little patients were chirping round again and away to bed, a game of cards on the same table. Such are the contrasts of life."

On Sunday, a Ruthenian father and mother called with a little tot of five, one of the worst cases on the entire itinerary.

"Again the ether bottle appears," says the dentist, "and while the father hovers fearfully in the next room, despite words of encouragement, the case is cleared up. Soon the little one is explaining in a foreign tongue, all her sensations to her relieved parents."

A side trip in a worn motor had its own excitement. "We came the last few miles on the rim with the dent at part time on the running board to keep the old car balanced and out of the ditch. Never did a warm stove look better at the five a.m. journey's end.

"And for a fitting climax to the trip was the last ride through a fair imitation of a blizzard over trails and ice-covered muskeg."

These picturesque incidents, picked at random from the report, show why it is stated in the introduction that "a campaign of this type must be a vital contributing factor in nation-building."

Some of the canoes built by the first race of Hawaiians could carry 50 men.

The earth's sensible atmosphere extends upward for about 100 miles.

IN THE THEATRE

"Is he really killing him?" "No, he only pretends to do so." "Then, why have we paid to come in?"—Himmel, Hamburg.

Spring Cleaning All Year

One of the fleet of vacuum trucks used by the Canadian Pacific Railway to help maintain the standard of cleanliness demanded for all its services. After each run, every square inch of carpet and upholstery is thoroughly cleaned, all movable portions, such as seats being taken out and treated by air. An army of cleaners are maintained at all terminals.

WORLD HAPPENINGS BRIEFLY TOLD

Dr. Izal Sylvestre, said to be the oldest practicing physician in Canada, died at his home in Sorel, Quebec, at the age of 83. He has been practicing medicine since 1867.

The trip to the British West Indies of their Excellencies, the Governor-General and Lady Willingdon, which was designed primarily as a rest and holiday, assumes also the aspect of a good-will journey.

Miss May Thornley, one of the best known temperance workers in Canada, is dead at the age of 71. She had been several times president of the Dominion Women's Christian Temperance Union.

The French government has sent its official acceptance to the invitation of the British government to participate in the five-power naval conference opening in London on January 21.

Leaders of the New Turkey have commenced to start observance of the Sabbath on the Christian Sunday instead of Friday, thus severing another of the ties which bind that nation to the Moslem world.

Honoring Dr. Augusta Stowe Gulen, the first woman to graduate in medicine from a Canadian University, the Medical Alumnae of the University of Toronto and other women physicians have had a portrait painted of her.

Long Standing Asthma. Many have suffered so long from asthma and have tried so many so-called remedies that they think there is no real help for them. They should read the letters received by the manufacturers of Dr. J. D. Kellogg's Asthma Remedy from hundreds of cases once as desperate as their own. Even in long-neglected cases this famous preparation brings prompt help.

Meaning Of Totem Poles

Used By Indians As Monument Of Important Events

Boy Scouts and Girl Guides use the word totem without, perhaps, quite realizing its origin and meaning. Totem poles are used by many native tribes in various parts of the world as monuments of important events and tombstones of the dead. To the Alaskan Indians, however, the tribal totem stands for the animal ancestor from whom he believes his tribe is descended, and it is connected with all his religious and social beliefs.

Persian Balm is the one true family aid for skin health and beauty. Aids the mother in additional loveliness. Protects the tender skin of the child. Delights the father as a hair fixative or cooling shaving lotion. No matter to what use it is put, it is always beneficial to the skin. Every woman should use it. Persian Balm cools and caresses the skin and creates complexion of surpassing loveliness.

Substitute For Tunnel

A vast double dam across the English Channel between Deal, England, and Calais, France, carrying two railway tracks, an automobile road and providing a ship canal, has been suggested by Jules Jaeger, Swiss engineer, as a substitute for the proposed underground channel tunnel.

HEADACHE RELIEVED

CARTER'S QUICKLY

Big Mineral Discovery

Deposit Of Copper and Nickel Ore Attracting Attention To Saskatchewan

The whisper of a great discovery has gone out all across the Canadian west, and the representatives of mining organizations, large and small, are endeavoring to ascertain the spot in northern Saskatchewan where the Dominion Explorers, Ltd., are reported to have made what appears to be the mineral discovery of the current year.

Members of the Dominion Explorers Organization have been brought in from different areas and have been flying away in one fixed direction, and the indications are the discoverers will have themselves all fortified in regard to holdings in the new district before rival claim-stakers may appear.

Dominion Explorers being a Lindley organization, they had the experience of dealing with big mineral deposits. Sherritt-Gordon has been a case in point where the mineral bearing fractures extend possibly to two to three miles in length, and the new discovery in northern Saskatchewan, while officials have remained reticent, yet the size of the organization has rendered it difficult to filter out. Outstanding features now definitely known are the big width of the deposit and the particularly great length—the surface being a close duplicate of Sherritt-Gordon—with the exception that whereas Sherritt-Gordon is copper and zinc, the deposit located by Dominion Explorers is copper and nickel.

Samples of the ore from the new discovery have been examined. These samples having been taken from surface where gossan lies heavy and where work has not yet reached entirely below the leached zone are extremely impressive and something which would justify the discoverers in rounding out for themselves a holding of at least 15 to 20 square miles.

The Power Of Softness

Snow Bank Would Stop Bullet Which Would Penetrate Solid Substance

A bank of snow six feet thick will stop a bullet shot at the distance of fifty yards. The bullet will not penetrate that downy bank of snow, but it will go through the solid emulsion when fired at three times the distance. The bullet shatters the steel, penetrates the solid bank; but the soft feathery snow has a way all its own, and it takes in that murderous lead and loves it, and as it were, soothes it.

Wonderful For Indigestion!

When your stomach feels bad; when you feel bloated; when you suffer from indigestion; when you feel miserable—a single dose of **Bismarck's Magnesia** will bring instant relief. Bismarck's Magnesia is the most effective and most reliable of all the antacids. It is a pure, natural, and harmless substance. It is a quick response. Pleasant and inexpensive to use. Ask your druggist.

May Have Started Something

Nebraska Fox Farmers Suing Airplane Company For Killing

Foxes With Noise
Mall planes roared a few hundred feet over a Nebraska fox farm. Down below, scores of foxes cowered in terror. Fifty-six of them died—and their owners are suing an aeroplane company for damages.

The outcome of the case will be watched with interest, because if the racket of airplanes kills foxes, and their owners can recover damages, there will be developments. Human beings are going to start collecting damages for nervous injuries caused by various modern noises.

Most of the noise caused by aeroplanes, and other things, is unnecessary. If it kills foxes, it must have a harmful effect on the health of citizens, who are, after all, almost as valuable. We are not "picking on" the aeroplanes in particular; it is no worse than a dozen other noise-makers.

Some time or other, civilization must tackle the noise problem—and solve it. Just now seems as good a time as any to start—Vancouver Sun.

If love is blind, jealousy is an eye-opener.

Minard's Liniment relieves stiffness.

Wheat Pool's Operations

New Controls 55 Per Cent. Of The Grown In Western Canada

Although in operation for a period of only five years, the Canadian Wheat Pool controls 55 per cent. of the crop grown in the prairie provinces in Canada and Montana, Saskatchewan and Alberta.

It owns and operates 1,435 country elevators out of a total of 5,042 in the prairie provinces and, in addition, owns a large percentage of the large terminal elevators at Fort William, Port Arthur, Vancouver, Prince Rupert and other points. The Pool has taken a leading part in helping to open up markets for Canadian grain in China and Japan and other countries, and has placed its handlings in over 60 different ports in Europe.

BABY'S OWN TABLETS A HELP TO MOTHERS

There is no other medicine as great a help to young mothers as Baby's Own Tablets. These Tablets are a mild but thorough laxative which regulate the bowels, sweeten the stomach, correct constipation and indigestion; break up colds and simple fevers and make the cutting of teeth painless. Mothers who keep a box of the Tablets in the house always get relief from the sudden attacks of illness that seize their little ones. If Baby's Own Tablets are given on the first sign of illness the baby will soon be right again. Concerning the Tablets Mrs. E. G. Carver, Lyndale, P. E. I. writes: "I always keep Baby's Own Tablets in the house and find them a wonderful help in keeping my baby well."

Baby's Own Tablets are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Alberta Turkeys

High standards for turkeys are being maintained by the Alberta Bronze Turkey Association, it was reported at a meeting of the Association in Calgary the other day. The average weight of turkeys before the advent of the association was 10 pounds. Now it is 12 pounds.

A perfect violin made by a Peterborough, Ontario, artist, is 4 ins. long, weighs a quarter of an ounce, and has ninety-nine separate parts.

Peevish, pale, restless, and sickly children owe their condition to worms. Mother's Graves' Worm Exterminator will relieve them and restore health.

The 1920 United States census shows that less than one in 2,000 persons in this country are blind.

"PINKHAM'S COMPOUND IS WONDERFUL"

Read This Letter from a Grateful Woman

Venues, Ont.—"I think Lydia E. Pinkham's Vegetable Compound is wonderful. I have six children of which four are living and my youngest is a bonnie baby boy now eight months old who weighs 23 pounds. I have taken your medicine before each of them was born and have certainly received great benefit from it. I urge my friends to take it as I am sure they will receive the same help I did."—Mrs. Milton McMILLAN, Venues, Ontario.

SUNDAY SCHOOL LESSON

December 1

THE CHRISTIAN HOME IN A MODERN WORLD

Golden Text: "Honor thy father and mother."—Ephesians 6.2.
Lesson: Deuteronomy 6. 3-9; Matthew 23.3-9; Luke 2.40-52; 24.29-32; Ephesians 6.1-9; 2 Timothy 1.3-5; 3.14-15.

Explanations and Comments

The Development Of The Boy Jesus, verse 40.—Like every one who has ever lived, Jesus entered the world as a helpless infant, and like all normal children, His power developed gradually. As a child He grew, and became strong, filled with wisdom; and the grace of God was upon Him.

"O that I may grow!"
What thought came furrows in my face,
My heart may ever add grace unto grace.
Graces with added days still keeping pace,
O that I may grow!"
—Maltbie D. Babcock.

Jesus At Twelve Years Of Age, verses 41-50.—When Jesus was only thirteen years of age, His parents took Him to Jerusalem for the first time to attend the Passover. Three times His parents were absent from Him to Jerusalem for the first time, and Joseph is referred to as the parent, or father, of Jesus. Dr. Carson, a leading English theologian, is rightly described as one of Jesus' parents, for in the home he provided and protected Him, filled a parent's place, and played a parent's part. To him also God had committed the care of Jesus. The Passover began on the fifteenth of Nisan, the first month, and lasted several days. It was a festival of eight days from Nazareth, their home in Lower Galilee, to Jerusalem.

When Joseph and Mary started home again, the boy, unknown to them, tarried behind in Jerusalem. They went a day's journey towards Nazareth before they missed Him, for they had supposed Him with kindred or acquaintances in the same caravan. They travelled in the company of many others returning to Nazareth and nearby towns, the boys and young men probably walking together in groups, and the older ones by themselves, many of whom were riding mules. "I question whether there is ever a pilgrimage made from Jerusalem to the Jordan at the present day without a separation of children and parents equally prolonged." Thompson. They spent part of one day hunting for Him in the caravan, another day in going back to Jerusalem, and on the third day they found Him in the temple, listening to the teachers and asking them questions so deep that all around were amazed at His understanding and answers.

"Son, why hast Thou thus dealt with us?" His mother questioned, adding, "Thy father and I sought Thee sorrowing." "How is it that ye sought Me?" asked Jesus, surprised that they did not know where to find Him. "Knew ye not that I must be about My Father's house?" Mary had said, "Thy father and I" meaning Joseph and herself, but Jesus spoke of His Father in heaven. "All this Jewish boy's interest in the temple, but we see in it also the boy's sense of His divine sonship. His parents had failed to understand His words, but Mary did not forget them—she kept all these sayings in her heart."

Corns disappear when treated with Holloway's Corn Remover without leaving a scar.

Christmas Seals This Year Are Christmas Bells

Send Them Out At This Season To Ring In Every Home

Ring out, wild bells, to the wild sky,
The flying cloud, the frosty night,
Christmas seals paid for seventeen
free clinics this year in Manitoba, and more.

Ring out old shapes of foul disease,
Ring in the nobler modes of life,
In 17 clinics, 2,104 "contacts" and "suspects," more than half of them children, were examined. 240 tuberculosis were found, 142 for the first time, and many other disease conditions.

Ring out the grief that saps the mind,
For those that here we see no need;
Manitoba needs a children's sanatorium. We have plans all ready, but—

Ring in the valiant man and free,
The larger heart, the kinder hand.

100 Christmas Bells, on 100 Christmas Letters, into 100 Homes, All For One Dollar. For Better Health In Manitoba. Set the Christmas Bells A-Ringing.

Caruso In Death

Friends Of Famous Singer Will Change Clothing On Enshrouded Body Every Three Hours

His public will see an immaculate Caruso even in death.
The famous singer's friends have decided to open his casket every three hours and change the clothing, keeping his remains constantly dressed in the latest fashions as long as the embalming maintains the perfect state of the body.

The plan was revealed in Paris by Tito Cipria, noted tenor.

Ever since his death, in 1921, the body of Caruso has rested in a crypt in Canessa tomb so that visitors may view it through the covering of the casket.

Requisite On The Farm.—Every farmer and stock-raiser should keep a supply of Dr. Thomas' Electric Oil on hand, for only as a ready remedy for ill in the family, but because it is a horse and cattle medicine of great potency. As a substitute for sweet oil for horses and cattle affected by cold it far surpasses anything that can be administered.

New Airplane Propeller

Development of a reversible airplane propeller, turning in opposite direction on landing and said to eliminate the ground loop menace, has been announced by the Richfield Oil Company. The new propeller weighs 30 pounds more than one of the standard type.

Catarrh

Heat and Inflammation of the Urinary Tract.
Excellent for colds in head, throat and chest.

With an increase of 8,000 last year and an increase of 67,000 during the period 1921 to 1929, the population of British Columbia is placed at 591,000.

PROBLEM FOR LEAGUE CREATED BY MENNONITES

Ottawa, Ont.—Cable advice received from Geneva, Berlin and Warsaw indicate clearly that the exodus of refugees Mennonites from the Soviet republic rapidly is assuming greater proportions and that while there has been no suggestion that Canada should consider taking more than 4,000 of them, the number that will have to find new homes somewhere in the world may reach the staggering total of 100,000 persons.

The 5,000 Mennonites who gathered in the environs of Warsaw a few weeks ago and concerning whom the Canadian government was approached by the German foreign office, appear now to have been but the advance guard of a constantly swelling stream of Mennonites. It is claimed that the entire Mennonite population of Russia, which has been increasing steadily for 150 years since the great Queen Katharine offered the sanctuary from religious persecution, will leave the republic. Within a few months upwards of 100,000 Mennonite refugees will have left Russia and will be facing starvation unless rescued by the League of Nations or the governments of Europe.

Hon. F. Nansen, the head of the refugee commission of the League of Nations, has communicated by cable with the Canadian government. He has stated that the League will endeavor in aid of the homeless Mennonites and he is confident that food and shelter can be provided in Europe and at the expense of the League until next spring.

This appears to remove any immediate danger of these people dying of exposure or starvation.

From what can be learned here, the Mennonites are not leaving Russia because of religious persecution, but because they claim that they have been reduced from a wealthy and thriving community to starvation by the exactions of the Soviet government. Their accumulated savings in money have been confiscated and their crops, each year, have been taken from them. They claim that there was no alternative except to stay in Russia and starve or to throw themselves upon the mercy of Europe, and hope for assistance to establish homes for themselves in the western world.

As far as the immigration department here is concerned, the answer of Premier Anderson to Bishop Towser is taken as being opposed to the movement of any Mennonites into Saskatchewan other than relatives of those in the province. Negotiations are under way with Manitoba and Alberta. Unless these provinces are willing to accept the Mennonites, the Dominion will decline to permit them to come.

It is felt that the League of Nations will carry the refugees over until spring and that there is plenty of time to consider very carefully the question of policy involved in bringing them to Canada.

Ocean Cables Broken

Several Connections Between America and Europe Severed By Earthquake

New York.—Six cable repair ships were groping the bed of the North Atlantic off the coast of Nova Scotia for cables broken by the recent earthquake along the seaboard.

Ten or more of the connections between America and Europe were severed by the upheaval among the hills and valleys of the ocean's floor.

Ask For British Control

Apla, British Samoa.—A petition requesting the King of England to take the control of Samoa from New Zealand, and to give it directly to England, was lodged with the administrator here for transmission. The petition was signed by 23 chiefs in behalf of the "Maui" organization of natives, which represents about 95 per cent. of the Samoans.

Logging In B.C. Curtailed

Victoria.—Draught's curtailment of logging operations is being effected at most Vancouver Island camps, in concert with the reduced activity general throughout Oregon, Washington, and British Columbia.

W. N. U. 1815

Makes Definite Change Against Communists

Cause Of Unrest In Africa Says Pretoria, South Africa

Pretoria, South Africa.—The definite charge that the activities of the Communist internationale are behind the widespread unrest among natives in the Union of South Africa was made in the course of a long address by Hon. Oswald Pirow, Minister of Justice.

Numerous organizations, cloaked with or at least in close touch with the Communist internationale, are responsible, the minister stated, for fanning the unrest which came to a head at Durban recently, when the government was forced to raid the native compounds and arrest 600 out of 5,000 natives who had refused to pay the poll taxes.

The minister also declared that unless the danger was checked strongly by the police, rioting on a large scale would be suffered within 12 to 18 months time.

Royal College of Physicians

Sixty Leading Figures In Canadian Medicine Meet At Ottawa

Ottawa.—The Royal Canadian College of Physicians and Surgeons came into being when 60 leading figures in Canadian medicine met here. The royal college was provided for at the last session of parliament, and has as its purpose the foundation of a standard of specialization in the medical profession. Toronto was chosen as the headquarters of the college.

Officers were elected as follows: President, Dr. John C. Macklin, Montreal; vice-president, Dr. F. N. G. Starr and Dr. Duncan Graham, both of Toronto; registrar-secretary, Dr. T. C. Routley, Toronto.

The original charter fellows as designated in the act of parliament establishing the college comprise university professors in medicine in the nine medical schools in Canada. About 60 of these were present and were sworn in.

Heavy Air Mail

Thousands Of Letters Are Awaiting Opening Of Northern Service

Edmonton.—One hundred thousand letters are at the central post office in readiness for the opening of air mail service to the north country. It was estimated by F. X. J. Leger, superintendent of the Edmonton postal division, a few days ago. The peak has not been reached yet as more first flight letters are being received here daily.

Three machines will in all likelihood be required for opening this service. Two of these would be extra aeroplanes for handling the large volume of letters sent here by first flight cover collectors.

Nothing definite has been settled as yet in regard to the date of opening the northern service, as this will start just as such as there is sufficient ice on the rivers for the machines to land on skis.

Wolves Invade Moscow

London, England.—An invasion of hordes of wolves in the crowded suburbs of Moscow was described in a Daily News despatch from the Soviet capital. The despatch said that the wolves had attacked adults and children and had devoured two small children. Moscow's suburbs recently have been overcrowded with peasants who have set up temporary homes while awaiting permission to migrate to Canada.

Sale Of Coal Discussed

London, England.—Right Hon. J. H. Thomas informed the House of Commons that he had had a number of further consultations with coal and shipping interests concerned in the increased sale of British coal in Canada. These had raised a number of questions which would require careful consideration and consequently he could make no further statement at present.

Occupy British Barracks

Weisbaden, Germany.—A battalion of French infantry has arrived here and taken over the barracks recently occupied by the British troops of occupation. Despite statements to the contrary, some quarters believed that the French intend to send detachments of troops to various places in Britain's former area of occupation.

FLASHES GLAD TIDINGS

Ross Smyth, 22-year-old student of McGill University, Montreal, who is the wireless operator on the Fort James, who flashed back to civilization the news that the missing Mac Alpine party was safe.

Over Three Millions Disbursed In Pensions

Latest Figures Show Canada Has 13,394 Old Age Pensioners

Ottawa.—On September 30, the last date for which figures are available, there was 13,394 old age pensioners in Canada, made up of 7,428 males and 5,966 females. Since the inception of the old age pension the sum of \$3,389,088 had been disbursed, the federal and provincial governments sharing equally in this distribution.

British Columbia, the first province to come within the operation of the act, had 4,214 pensioners and had dispensed \$1,520,882 in pensions. Manitoba followed with 1,164. Alberta, whose provincial enabling act became operative on August 1, 416 and \$14,516. The Northwest Territories, which is exclusively a federal scheme, had one male pensioner who drew \$51.53.

No payments have yet been made on account of the province of Ontario.

Alberta Election Rumor

Premier Brownlee Says Question Of Election Next Year Has Not Been Discussed

Edmonton.—Asked about the probability of the Alberta general elections being held in June of next year, as rumored in Calgary, Premier Brownlee replied that "It's nice to have matters of this sort decided for the government without its having to deal with them at all."

The premier had no further comment to make, except to say that the question has not yet been discussed by the government in any way. The farmer government in Alberta if it rides out its full term, need not go to the polls again until 1931, but Calgary rumor has it that it will do so next year.

Would Retain Plant

Moose Jaw, Sask.—Recommendation that the Moose Jaw power plant be retained as a municipally-owned utility and opposition to its proposed sale to private interests, was voiced in the report to the Trades and Labor Council by a special committee. The report was adopted.

To Aid in Industrial Development

The rapid development in power projects and other engineering works at widely separated points throughout the country has created a demand for rolling stock capable of handling unusually heavy and bulky shipments such as transformers, rotors, etc.

In order to take care of business of this kind, the Canadian Pacific Railway recently put into service two depressed center all steel flat cars which were designed by the Mechanical Department and built at the Angus Shops.

These cars are 63 feet 9 inches long inside the coupler knuckles. The center portion is depressed so that the height from the rail to the top of the deck is 2 feet 4 inches, and the portion which is available for loading is 22 feet 7 inches long.

The weight is 89,700 lbs., and they will carry a load of 225,300 lbs. Six wheel trucks with rolled steel wheels are used.

Good Market For Wheat

Britain Will Purchase Grain Stored In Canada Says Expert

Toronto.—"In light of my experience in England and from reports I have received concerning the wheat supply in other countries, I see no reason why the millions of bushels of Canadian wheat at present in storage should not be sold at satisfactory prices before the new year's yield," said W. A. Wilson, Canadian agricultural representative in London, England, upon his arrival here from the Old Country.

With an intimate knowledge of the wheat situation, Mr. Wilson did not hesitate to say that in his opinion the time had come when Canadian wheat, at present filling the giant elevators at different points throughout the West would move toward the great British market.

The Canadian agricultural representative declared that statistics he had been able to gather on the wheat supply throughout the world all pointed toward big purchases of Canadian wheat before the 1930 crop.

Earthquake Shakes Liner

Vessel, 640 Miles Out At Sea, Receives Vibrations From Shore

New York.—The earthquake which was felt along the coast from New York to Halifax, recently, also shook the liner "Olympic," 640 miles out at sea, from stem to stern, her commander reported on arrival here from Southampton and Cherbourg.

It provided an alarming experience for the officers of the Olympic, for they did not know what had happened. They were afraid she had hit a submerged wreck and perhaps damaged her hull.

The vibration was so severe, he said, that it shook out the electric lights in the main room. Stewards and passengers rushed to the promenade deck to find out what had happened.

British Cadets Coming

Will Attend Annual Meet In 1930 Of Canada Rifle Association

Ottawa.—Cadet contingents from Great Britain will attend the annual shoots in 1930 of the Dominion of Canada Rifle Association and the Ontario Rifle Association, it was announced in a letter received from the Department of National Defence from Surgeon-Captain R. J. E. Hanson, honorary organizer of the Imperial Cadet Association.

The contingent of 19 cadets will be headed by Major J. M. West, Shrewsbury Officers' Training Corps, as honorary commandant.

Two Noted Authors III

Conan Doyle and Kipling Unable To Fill Engagements

London, England.—Two of Great Britain's best known authors—Rudyard Kipling and Sir Arthur Conan Doyle—are in poor health.

The British Broadcasting Corporation announced Kipling had cancelled a proposed radio speech December 12, because he had been ordered abroad for his health.

Sir Arthur, driven abed by overwork at his home at Crowborough, in Sussex, has cancelled all engagements for the next few months.

PREPARE PLANS FOR 1932 GRAIN SHOW AT REGINA

Toronto.—Laying their plans for the future, when the world's grain exhibition and conference will be held in Regina, Sask., July 25 to August 6, 1932, the executive and finance committee met here recently.

Under the chairmanship of Hon. W. C. Buckle, Minister of Agriculture for Saskatchewan, the committee held a brief general discussion and announced several appointments of committee chairman and others who will aid in carrying out the extensive program. The grain conference, the first of its kind undertaken by Canada, bids fair to eclipse any similar undertaking of an international character.

Announcement was made recently that the appointment of judges for the exhibition will be along international lines.

The total price list, official announcement of which will shortly be made, for the various classes, an amount of \$201,500. Of this amount \$15,000 will be allotted to the hard spring wheat class alone, with \$2,500 the first place award.

Appointed to the committee recently of Dr. E. H. Grisdale, deputy minister of agriculture for Canada, as chairman of the conference program. Dr. Grisdale will name his own committee, which will attend to the securing of speakers, who will present papers at the conference.

F. H. Auld, deputy minister of agriculture for Saskatchewan, was appointed chairman of the exhibits committee, and L. H. Newman, Dominion cerealist, was named chairman of the awards committee.

Ernest Rhodes, B.S.A., of the Dominion Department of Agriculture, secretary of the 1927 world's poultry congress, was appointed secretary. The portion during the earlier organization was held by D. T. Elderkin, manager of the exhibition, who now becomes a member of the executive.

S. Laits, former Minister of Education for Saskatchewan, was named publicity director.

His Excellency, Lord Willingdon, Governor-General of Canada, has consented to act as chief patron.

The personnel of the executive and finance committees are: Hon. W. C. Buckle, Minister of Agriculture for Saskatchewan, chairman; Hon. W. R. Motherwell, Dominion Minister of Agriculture; Hon. A. Prefontaine, Minister of Agriculture for Manitoba; C. H. Hamilton, Dominion Grains Commissioner and former Minister of Agriculture for Saskatchewan; Dr. J. H. Grisdale, Deputy Minister of Agriculture for Canada; F. H. Auld, Deputy Minister of Agriculture for Saskatchewan; A. E. Whitmore, Regina; D. T. Elderkin, Regina; W. Yule, Regina; J. A. Mooney, Regina, and Ernest Rhodes, secretary.

Would Shorten Working Hours

Winnipeg.—The Dominion was requested in a resolution sent by Mayor Dan McLean, to take under consideration a plan to shorten the hours of working men in Canada. Details of the plan or to what extent the working day should be cut were not divulged. It is aimed to give employment to hundreds of men now out of work throughout the country, Mayor McLean said.

Rob Quebec Bank

Montreal.—Three armed and masked men walked into the office of the Canadian Bank of Commerce at St. Christy's, Que., about 30 miles from Montreal, told the manager and cashier to chain and escape with cash estimated at \$500. The bandits, who had prepared their way by cutting telephone wires, drove off in an automobile.

Wants Official Delegates

London, England.—The British government despatched communications to Italy, France and Japan urging that those governments be represented at the annual five-power conference by civilian ministers rather than delegates chosen from the armed services.

Royal Wedding Gift

Rome.—The wedding gift of King Victor Emmanuel to Prince Humbert and Princess Marie Jose, of Belgium, will be the Chateau of Raconigi, in Piedmont, birthplace of the Crown Prince.

C.P.R. Herd Wins Hundreds of Prizes

Here are some of the 179 first prizes and 73 championships and reserve championships won by the Strathmore Farm, herd on the prairie and coast show circuits during the current and last year. The Strathmore show herd of fifteen Holsteins won 100 first prizes at 8 major exhibitions in 1928 and 79 firsts in 1929. The

shield at lower left was won by a carload of calves from the Canadian Pacific farm at Chin, Alberta in 1928. The large cup, right, was won at the Cal. try spring show for the best purebred Aberdeen Angus heifer. Diploma at right was won by the Holstein bull Strathmore McKinley Fairchild Wayne as grand champion in 1928. He is shown at one end and he went through

all western fairs without a defeat from 1927 to date. He was Grand Champion at the three coast fairs and also at Saskatoon. The Canadian Pacific Railway thus won one of the finest, if not the finest, herd of cattle in Canada. The company has done a great work in promoting the breed of cattle throughout the West.

Know Canada Contest

The Family Herald and Weekly Star, so well known as Canada's outstanding farm and home paper, is launching another of their Know Canada Contest, in which \$3000.00 are being given as prizes. The First Prize is \$1000.00.

Each week four pictures are published and readers are asked to decipher the Canadian post offices they represent. It is a most interesting pastime, combining a great deal of real amusement and entertainment with an opportunity of carrying off a very nice sum of money in prizes.

It is a contest that will interest every one of our readers and details of it can be had for the asking. A letter to the Family Herald & Weekly Star, Montreal, will bring you all the particulars and a sample copy of the paper too and of course it does not obligate you in any way.

Open Seasons for Game

Following are open seasons for game—Ducks and Geese—Sept 16 to Dec 14th.
Hungarian Partridge—Oct 1 to Nov. 30.
Prairie Chicken and Partridge—No open season.
Deer—Nov 1 to Dec 14
Otter, Nov. 1 to May 1.
Beaver, No Open Season.
Muskrat—Between North Saskatchewan and Tp. 91, March 15 to April 15.
Game Licenses can be had at Sun Office, where copies of the Game Act can be seen.

The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, singing waiter at Blackie Joe's New York night club is loved by Grace Farrell, the cigarette girl, but he doesn't know it. He marries Molly Winston, a ballad singer, and wins fame as a composer of popular songs. When their baby, Junior, is about two years old, Molly elopes with John Perry, Al's best friend. She and Perry take the child Al adores and sail for France. Al, completely broken by the loss, disappears from Broadway and becomes a derelict. One day Grace Farrell sees him on the street, but he runs away. Grace starts a search for him, who ends in failure. But the image of Grace remains vividly in Al's mind.

CHAPTER XXIII.

Something of Al's old generous spirit toward Grace returned as he thought of her. How concerned her expression had been yesterday as she stared at him from across the street. Yet his feeling toward her was not strong enough to overcome the resistance of his desire to separate himself from the old life.

In spite of all that, however, the memory of her face remained in his mind. Perhaps it was this memory that brought him up sharply about three o'clock one morning before a house that seemed strangely familiar. Surely he knew these outside steps, and that entrance. It was Blackie Joe's place.

Slowly, scarcely knowing what he was doing, Al mounted the shabby stairs toward the little gleam of light he saw at the top. Yes, he was sure of the place now; an intense longing possessed him to see the inside of the old familiar place where he had won his earliest triumphs. Only a few years had passed since those happy-go-lucky nights, but the time seemed like a century.

He stopped before the heavy, bolted door. It was a new door, much stronger than the one Al had known. The many raids of the prohibition agents had forced Blackie to take additional precautions; his place was better guarded now.

Al knocked against the panel set high in the door and presently it opened. A strange face gazed at him, and the eyes became more suspicious every moment, as their owner looked him up and down, noting his disheveled clothes.

"Is Blackie Joe here?"

"Who wants to know?" asked the guard curtly.

"I do. I know him."

There was a pause, then: "Gwan, beat it! He's got no time for the likes of you!"

The panel closed with a slam. Al, nodding listlessly, began to descend the stairs. He shrugged his shoulders—it didn't matter.

Inside, Blackie had been standing fairly near the door. "Who wants me?" he called, after the aperture was closed.

"Oh, just some bum," said the door-keeper scornfully.

Blackie nodded and turned to look over his dance floor. But as he did so there was a faint stir of curiosity in his mind. A bum—well, what did the bum want?

He walked over to the door and pulled open the panel. At the foot of the stairs, clearly silhouetted against the light, he saw a familiar face.

At first Blackie did not recognize the figure at the foot of the night club stairs as Al Stone, his old singing waiter. But the familiarity of the profile was striking enough to make Blackie throw open the door and call, "Hey—yoo!"

At that, Al turned, so that his face was illuminated by the light at the head of the stairs. Now Blackie was sure—he came rushing down the stairs to, to Blackie's hand.

"Hello there, kid!" Blackie almost shouted in his delight. "We've been wondering where you were. And to think—I almost let you get away!"

Al stared into the face of his former boss, smiling faintly. It seemed as if Blackie would never relinquish that vigorous grip on his hand. A thrill of pleasure shot through Al—it was good to see someone at last who was really glad to see him, who beamed on him in the most friendly way imaginable. That hadn't happened to Al for months. He glanced away to hide his embarrassment at his shabby appearance.

Then Blackie linked his strong arm within Al's and led the young songwriter up the stairs, talking as he went.

"You know, Al, this is a big moment for us all. I want you to come in and meet the performers—some of them you know. And Grace is still with us—you remember her?"

Al nodded, but said nothing. Blackie saw he was dealing with a man who was not only bewildered, but had definitely lost his gift for carrying on in the battle of life. The arm inside Al's coat sleeve was limp.

As they stepped inside the door-keeper stared in amazement to see his well-dressed employer walking arm-in-arm with this bum. What on earth did it mean?

It was well on toward daylight and

only a few customers remained in the main dining-and-dancing room.

"Come back to my office," suggested Blackie. "We'll have a good talk."

But Al stopped, scanning the familiar room as if he expected to find the ghosts of his former triumphs there. His eyes took on the look of concentration that is habitual with men who try to escape the world and commune only with themselves. He forgot that Blackie was standing beside him, looking solicitously into his face. . . . Yes, there was the table where Molly and Marcus and the others sat on the night he sang "Always" to Molly. There was the old door leading to the bar. The floor show had ended, but the orchestra was playing and a few couples were dancing.

"Come," repeated Blackie, and Al followed him toward the private office.

They sat down, facing each other. "Have a cigar, have a drink?" suggested the night club owner, but Al shook his head. Then Blackie began again:

"Now, boy, I wish you'd tell me all about it. What happened to you—where have you been hiding out all these months?"

"Oh, here and there—just wandering about," Al replied noncommittally.

"Yes, I know that. But do you know that Marcus has been after you? And a couple of song publishers have been paying you all over town."

"Yes, I know it, came the strangely pensive answer. "I'm not interested in all that. I told Marcus I was through and I meant it. I really don't know why I came here tonight—just happened to look up and saw your entrance. Couldn't stay away from the old place forever, I s'pose."

A hopeless frown stole over Blackie. "This was just the shell of the old Al; Blackie felt how strong that apparently listless resistance of his would be to any come-back. Nevertheless, he leaned forward and said earnestly:

"Al, you don't have to tell me how you feel—I know. It may seem strange to you, but I was knocked out once myself, in the same way, by a woman. For a while I thought there was no use living; then the day came when someone gave me a good stiff talking to. I decided to fight my way up again, and I did. I decided I wouldn't let one blow put me down for the count!"

"Blackie, the reformer," murmured Al. An expression somewhere between a smile and a sneer curved the corners of his mouth.

Blackie leaned back in his chair, hurt, but determined not to show it. In the old days Al could never have made a sardonic and bitter rejoinder like that.

"Do you still love Molly?" Blackie asked incredulously.

"No!" The sharp denial was the first show of life Al had shown. Blackie nodded in approval. Then Al seemed to think that some further explanation was needed. "She did for me and first I had to clean her out of my mind. I did that—then I tried to write. But I found I couldn't get interested. It was no use."

Just then a waiter stuck his head in the door and told Blackie a customer wanted to speak to him. Blackie rose.

"Excuse me a minute, Al. Make yourself at home—I'll be right back."

(To Be Continued.)

Workers Helped By Science

Ore Detector Located New Body and Furnished Work For Discharged Miners

The practical ways in which science helps working people is demonstrated again in England. A lead mine in Derbyshire had "petered out." Two young schoolmasters invented an ore detector, just about the time a hundred miners had been discharged. With the detector they located a new lead-ore body, 1,000 feet under the surface. They figured it was worth about \$250,000. The mine owners, having faith in science, put the miners back to work again, located the ore body through a tunnel and now the mine is working full blast. Politicians continually promise miracles to working folk. Science performs the miracles—Vancouver Sun.

Stop falling hair with Mince's Lament.

Long Lived War Leaders

Four Who Bore Heavy Burdens Have Become Octogenarians

For months before his death Stresemann was a man broken in health, anxiously watched by relatives, friends and physicians, kept to a rigid diet, sent to bed early—he was an invalid, indeed, ere he had reached his fiftieth birthday. Friesenbarg, on the other hand, celebrated his eighty-second birthday, which fell on the day before Stresemann died, by going on a hunting trip, which was cut short by the Minister's death.

Ten years of peace killed Gustav Stresemann; three wars—one the most terrible in history, in which he was the supreme leader on one side—have proved insufficient to lay Paul von Hindenburg low. Can it be that we have heard far too much about the terrors of war, far too little about those of peace? It would seem so—at least in so far as the longevity of war leaders is concerned.

Today, fifteen years after the outbreak of the World War, and eleven years since its close, there are four men who can proudly boast that, despite having borne heavy burdens of leadership between 1914 and 1918, they have nevertheless become octogenarians. Hindenburg is one of the others, two are military men, Fofre and Mackensen—and the other a civilian who was at the head of his country's war-time government at a time of acute crisis—Georges Clemenceau.

Certain morbid conditions must exist in the stomach and intestines to encourage worms, and they will exist as long as these morbid conditions permit them to. To be rid of them and spare the child suffering, use Miller's Worm Powders. They will correct the digestive irregularities by destroying the worms, conditions favorable to worms will disappear, and the child will have no more suffering from that cause.

Using Steam From Volcano

Steam issuing from fissures in the earth near the main crater of Mount Etna will be used this winter to supply the central heating plant of the volcanological observatory on the higher slopes of the mountain. Professor Gaetano Ponte, director of the Etna observatory, said.

Representative Wanted

An opportunity to make a highly profitable connection is offered to one responsible person in each city, town and village in Manitoba, Saskatchewan and Alberta.

Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali, which neutralizes acids. But don't use crude boric. Use what your doctor would advise. The best help is Phillips' Milk of Magnesia. For 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Learn now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Calendar.

NOVEMBER
28—Moose Lodge's whist drive in Miller's hall.

22—Concert at Governor School.

Free Freight Feed Must Be Inspected.

Every precaution will be taken to prevent the spread of noxious weeds from one section of the province to another under the arrangement whereby hay, straw, greenfeed feed oats and barley will be shipped freight free into the districts where additional feed will be required the coming winter.

All shipments of this kind must be inspected before being loaded. In northern Alberta inspection will be made by F. Stevens, of Field Crops Branch. Intending shippers are advised free freight feed cannot be loaded until a certificate of inspection has been secured, showing it to be free from noxious weeds.

Here and There

(123)

"Say it with apples." Canadian Pacific Express Company slogan for the sending of gifts to Canadians to friends in Great Britain and Europe, is being extended from Christmas and New Year presents to gifts sent at all times of the year. With the present banner apple crop of Canada, the fruit can be bought at a reasonable price and its quality is of the highest. If sent overseas before the close of navigation, on the St. Lawrence coast will be considerably reduced.

Over 300 officers and men of the 4th Canadian Mounted Rifles first mounted regiment, formed in Toronto at the outbreak of the Great War, is holding its first reunion since the war at the Royal York Hotel, Toronto, November 29 next. The unit is proud of the fact that it still has in its ranks T. Holmes of Toronto, youngest Victoria Cross holder in Canada who captured an enemy machine gun nest singlehanded at Passchendaele.

An apple tree, over a hundred years old, coming to its symmetry and having this year produced 22 barrels of Calkin Pippin apples is attracting much attention in the orchard of Downey Morton, Lakeville, King's County, Nova Scotia. Mr. Morton picked apples from the same tree 55 years ago and it was then a fully grown tree. Today he believes it to be well over the century mark.

The arrangement existing between the Canadian Pacific Railway and the Government of Nova Scotia with regard to East European immigration which has proved mutually satisfactory, will be continued for the coming year, is the recent announcement of L. B. Fraser, secretary to Premier Rhodes.

Superior grazing conditions in British Columbia are given as the reason for a shipment of 3000 grade Ramboulet ewes and rams from Montana recently made to the Vancouver Live Stock Exchange for distribution to sheep raisers in the Kamloops and Cariboo districts of British Columbia.

The farm of Gustav Elwert of Westsaskatoon that won the trophy recently offered by the Edmonton Board of Trade for the best field of wheat in the northern half of the province of Alberta as well as the cup donated by the Alberta Government for the best farm in Alberta, has yielded 46 bushels to the acre on a 100-acre field and graded No. 1 hard. Elwert is another farmer who came to Canada without capital and has made a striking success.

The British Family Re-Union Association has just been created by the Canadian Pacific department of Colonization and Development—backed by influential organizations, groups and individuals—to promote increased British settlement in Canada. It will particularly benefit head of families in Canada desirous of having their wives and families join them in the Dominion, and others established on this side wishing to help relatives or friends overseas to emigrate to the Dominion for permanent residence.

Stony Plain and District

In the District court, Edmonton, on Monday, before Judge Crawford, the appeal of Geo Meisner from a conviction made by Magistrate Williams under the V. & H.T. Act, was dismissed with costs and the conviction sustained.

At the local Court Tuesday the magistrate's time was taken up with the hearing of the case of Philip Fischer. Barny Miller, on whom the injury is said to have been inflicted, had been discharged from the hospital and was present in court. The evidence of several witnesses was taken, after which the case was adjourned for a week. Geo J Bryan for defendant.

Stony was visited by two wind storms Monday, the first occurring on Main St, when some Russian immigrants who had come together for a social reunion, failed to agree on some point, the party breaking up in disorder, each side indicating in strong language that the other were of doubtful ancestry, etc. etc. The other storm occurred about midnight, when the wind got up to 36 m.p.h.

GIRL WANTED, at Christie's Restaurant.

The Ladies Aid of United Church are holding a bazar in the Town hall next Saturday, Nov. 30.

A sacred Cantata entitled "The Coming of the King" will be given by the pupils of the Sunday school in the United church, Sunday, Dec 15, at 7.30 p.m. All are welcome.

GIRL WANTED, at Christie's Restaurant.

The St. Matthew Ladies Aid are holding their annual bazar on Sat. Dec. 7, in St. Matthew Schoolhouse No. 2.

GIRL WANTED, at Christie's Restaurant.

Breitkreutz-Thom

On Tues. Nov. 28, at St. Matthew's church (Missouri Synod) by Rev E Eerhardt, Miss Hilda Thom was united in marriage to Mr Rudolf Breitkreutz of Stony Plain. After the ceremony the bridal party sat down to a recherche dinner, in Stony Plain. In the evening the happy couple gave a wedding dance to their friends in a local hall, which was well attended.

Wedding at Partridge Hills.

Rev G A and Mrs Sauder were present this week, at Partridge Hills, where the former's sister Miss Clara Sauder was united in marriage to Mr H T Hanley. The ceremony was performed in the United church, by Rev J E Hodgins, assisted by Rev G A Sauder. After the ceremony a reception was held at the home of Mrs V Laurence, sister to the bride.

Hockey Rink Enlarged.

The extension to the local skating rink, long premeditated, is now an accomplished fact, thanks to the few good sports who have agitated for the improvement in and out of season. The enlarged rink is now the size required by the N.H.A., being 196.85 ft. It is the intention of the club to apply for admission to the Mercantile League.

Montreal with Pen and Pencil

One of the oldest, most picturesque and historic cities on this continent—the city of Montreal—has found a worthy biography in the work of Victor Morin and the wellknown Canadian Academician Charles W. Simpson, who have between them produced, under the auspices of the Canadian Pacific Railway, a description in words and drawings bearing the above title. Written originally in French it has been rendered into English in a

translation that conserves the original verve and atmosphere of the book. In forty pages of clear and readable type with fifteen full page reproductions of pictures that are in themselves works of art, the story of the city is told for the past three hundred years. Lay-out shows two contrasted and typical scenes: the famous church of Notre Dame, second largest on the continent; and Bonsecours market that resembles a scene taken from a city of Normandy.

Spruce Grove News

At the Coroner's inquest, in Edmonton on Saturday, into the deaths of the two men Higgins and Guerela, killed at the Beuerlein crossing on the 21st, the jury brought in a verdict exonerating the train crew from all blame in the affair.

Mr Geo Laight, formerly agent at Kupaasiwin I.R., has been transferred to the Reserve at Winterburn, where Agent Rice is in charge. Mr Laight moved down last week with his family. Mr Jack Ward, farm instructor at Winterburn I.R., has gone to Kupaasiwin.

Mr Joe D Miller was a delegate to the Hotelmen's convention in Edmonton, last week.

In the Edmonton police court on Monday H F Calla hoo was dismissed on a charge of failing to bring his car to a stop at 124 St. and Stony Plain road. The "stop" sign was behind a phone pole.

Holborn Happenings.

The dances at the local hall are coming thick and fast, at present. The bazar and dance Friday night was well patronised; the music for the dance being provided by the Barths. The Novelty dance Wednesday evening was featured by the return of the well known and popular Helge Anderson's musicians.

Holborn Rifle Club is putting on a big turkey shoot on Saturday afternoon at the Butts. Over a score of turkeys have been ordered, so there's a bird for everyone—who can shoot.

Carvel Clippings

The funeral service took place on Thursday last of Mrs Helen Adams (wife of Louis Adams) who passed away in the City on the 19th, aged 41 years. Interment was made in Beechmont cemetery, Rev S F Tackaberry officiating. She is survived by her husband and one son.

Turlock & Schmigeliski, the motor expressmen, are doing a big business at present, bringing stock to the City for the farmers.
